### IMPLEMENTATION OF RING TOPOLOGY USING PACKET TRACER

#### AIMS:

To Implement a Ring topology using packet tracer and transmit data between the devices connected using Ring topology

#### SOFTWARE / APPARATUS REQUIRED

packettracer / End devices, Hubs, connectors.

#### STEP FOR BUILDING TOPOLOGY

1. Start packet tracer
2. choosing devices and connections
3. Building topologies - adding hosts
4. connecting host to switches
5. connect pc to switch by first choosing connection
6. Configuring IP Address and subnet mask for the host
7. To confirm data transfer between devices

By  
Brijesh.

#### RESULT

Thus, the ring topology is implemented with packet tracer simulation tool
